

Study Number: MOG002B
Test Type: MOG
Route: Dosing in Feed
Species/Strain: Rat/Sprague-Dawley

R14C: Time to Attainment Curves for Testicular Descent
Test Compound: 2-Hydroxy-4-methoxybenzophenone
CAS Number: 131-57-7

Date Report Requested: 10/29/2018
Time Report Requested: 14:04:45
Lab: RTI

C Number:

MOG002B

Study Gender:

Both

LEGEND

Cumulative response percent, obtained using the methods of Kaplan-Meier, are plotted against the time to attainment values.

For litter response analysis, animals recorded as not having attained testes descent on a postnatal day prior to PND 28 are excluded from the analysis.

For litter response analysis, the dam median is used as time to attainment if >50% of the pups for that dam attained testes descent. Otherwise, dam litters not having > 50% of the pups attaining testes descent had time to attainment set to 28. These dams are included in the denominator of calculation but not the numerator.

EE = Ethinyl estradiol
