a: Each dose is compared to the control with Williams' test when a trend is present ($P < 0.01$ from Jonckheere's trend test), or with Dunnett's test when no trend was present [* = $P < 0.05$, ** = $P < 0.01$]

b: Mean ± standard error [number of dams]

c: GD=Gestational Day

d: Decrease in N at GD 18 due to biological sample collection.
