Study Number: I11054
Test Type: TOX
Route: Oral Gavage
Species/Strain: Mouse/B6C3F1/N

M09M: Serum Antibody Concentrations for the T-Dependent Antigen Keyhole Limpet Hemocyanin (KLH)
Test Compound: Sulfolane
CAS Number: 126-33-0

Date Report Requested: 09/12/2018
Time Report Requested: 10:05:01
Lab: Burleson Research Technologies

C Number: I11054
Study Gender: Female
PWG Approval Date: See web page for date of PWG Approval

Data are displayed as mean ± SEM (N) unless otherwise noted.
Statistical analysis performed by Jonckheere (trend) and Shirley or Dunn (pairwise) tests (unless otherwise noted).
Statistical analysis for the positive control group compared to the vehicle control group was performed using the Kruskal-Wallis test.
* Statistically significant at $P \leq 0.05$
** Statistically significant at $P \leq 0.01$
Statistical significance for the control group indicates a significant trend test
Statistical significance for a treatment group indicates a significant pairwise test compared to the vehicle control group
KLH - Keyhole Limpet Hemocyanin; IgM - Immunoglobulin M; IgG - Immunoglobulin G
Decrease in N for anti-KLH IgM in the 50 mg/kg CPS dose group is due to one animal's value being excluded because it was an outlier.
CPS = Cyclophosphamide
