

Study Number: MOG11042
Test Type: MOG - Range Finding
Route: Dosing in Feed
Species/Strain: Rat/Harlan Sprague Dawley

R16C: Time to Attainment Curves for Pubertal Markers
Test Compound: Triphenyl Phosphate
CAS Number: 115-86-6

Date Report Requested: 07/11/2022
Time Report Requested: 10:38:42
Lab: Battelle

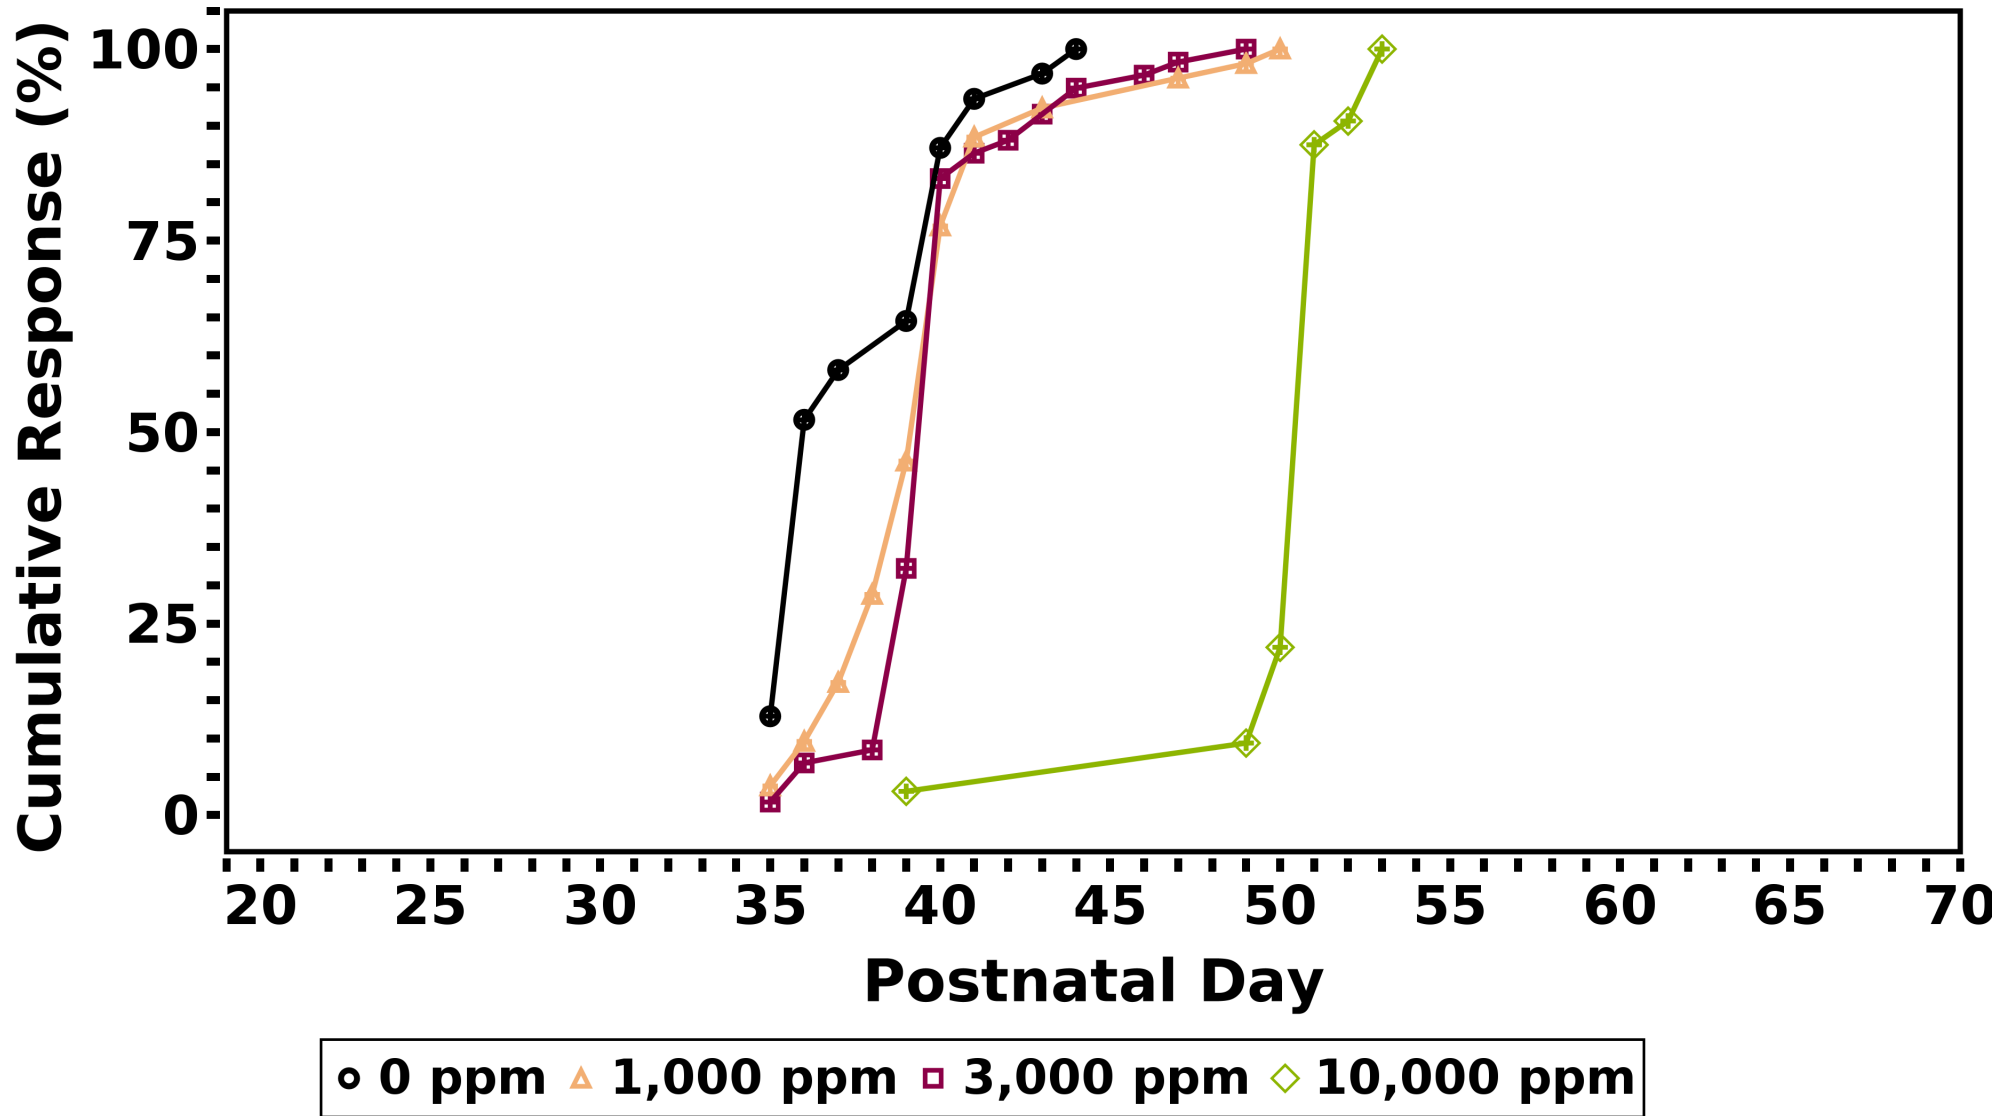

Study Number: MOG11042
Study Gender: Both
PWG Approval Date: See web page for date of PWG Approval
Version: v1.4.1
Stat Version: S

Study Number: MOG11042
Test Type: MOG - Range Finding
Route: Dosing in Feed
Species/Strain: Rat/Harlan Sprague Dawley

R16C: Time to Attainment Curves for Pubertal Markers
Test Compound: Triphenyl Phosphate
CAS Number: 115-86-6

Date Report Requested: 07/11/2022
Time Report Requested: 10:38:42
Lab: Battelle

F1 BPS Individual Response

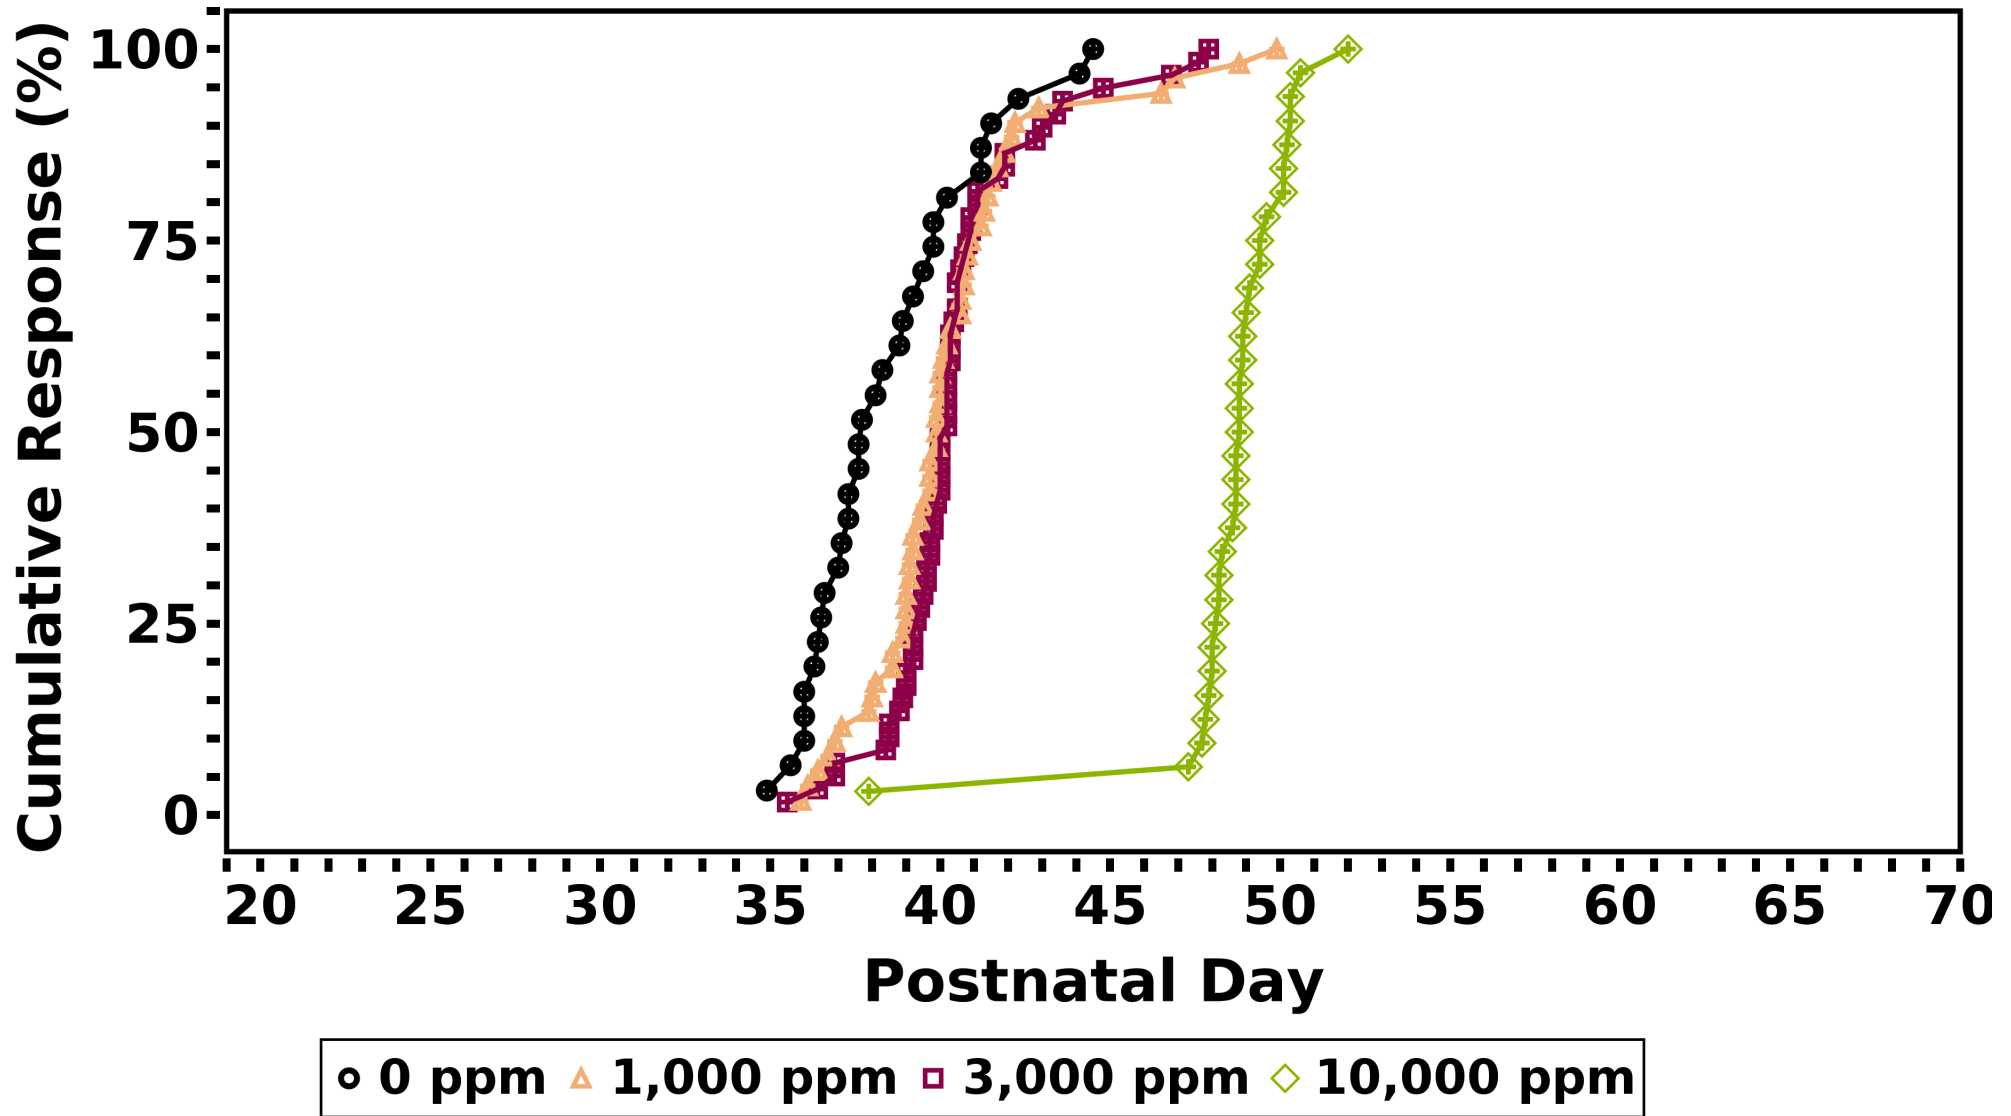

Study Number: MOG11042
Test Type: MOG - Range Finding
Route: Dosing in Feed
Species/Strain: Rat/Harlan Sprague Dawley

R16C: Time to Attainment Curves for Pubertal Markers
Test Compound: Triphenyl Phosphate
CAS Number: 115-86-6

Date Report Requested: 07/11/2022
Time Report Requested: 10:38:42
Lab: Battelle

F1 BPS Adjusted Individual Response

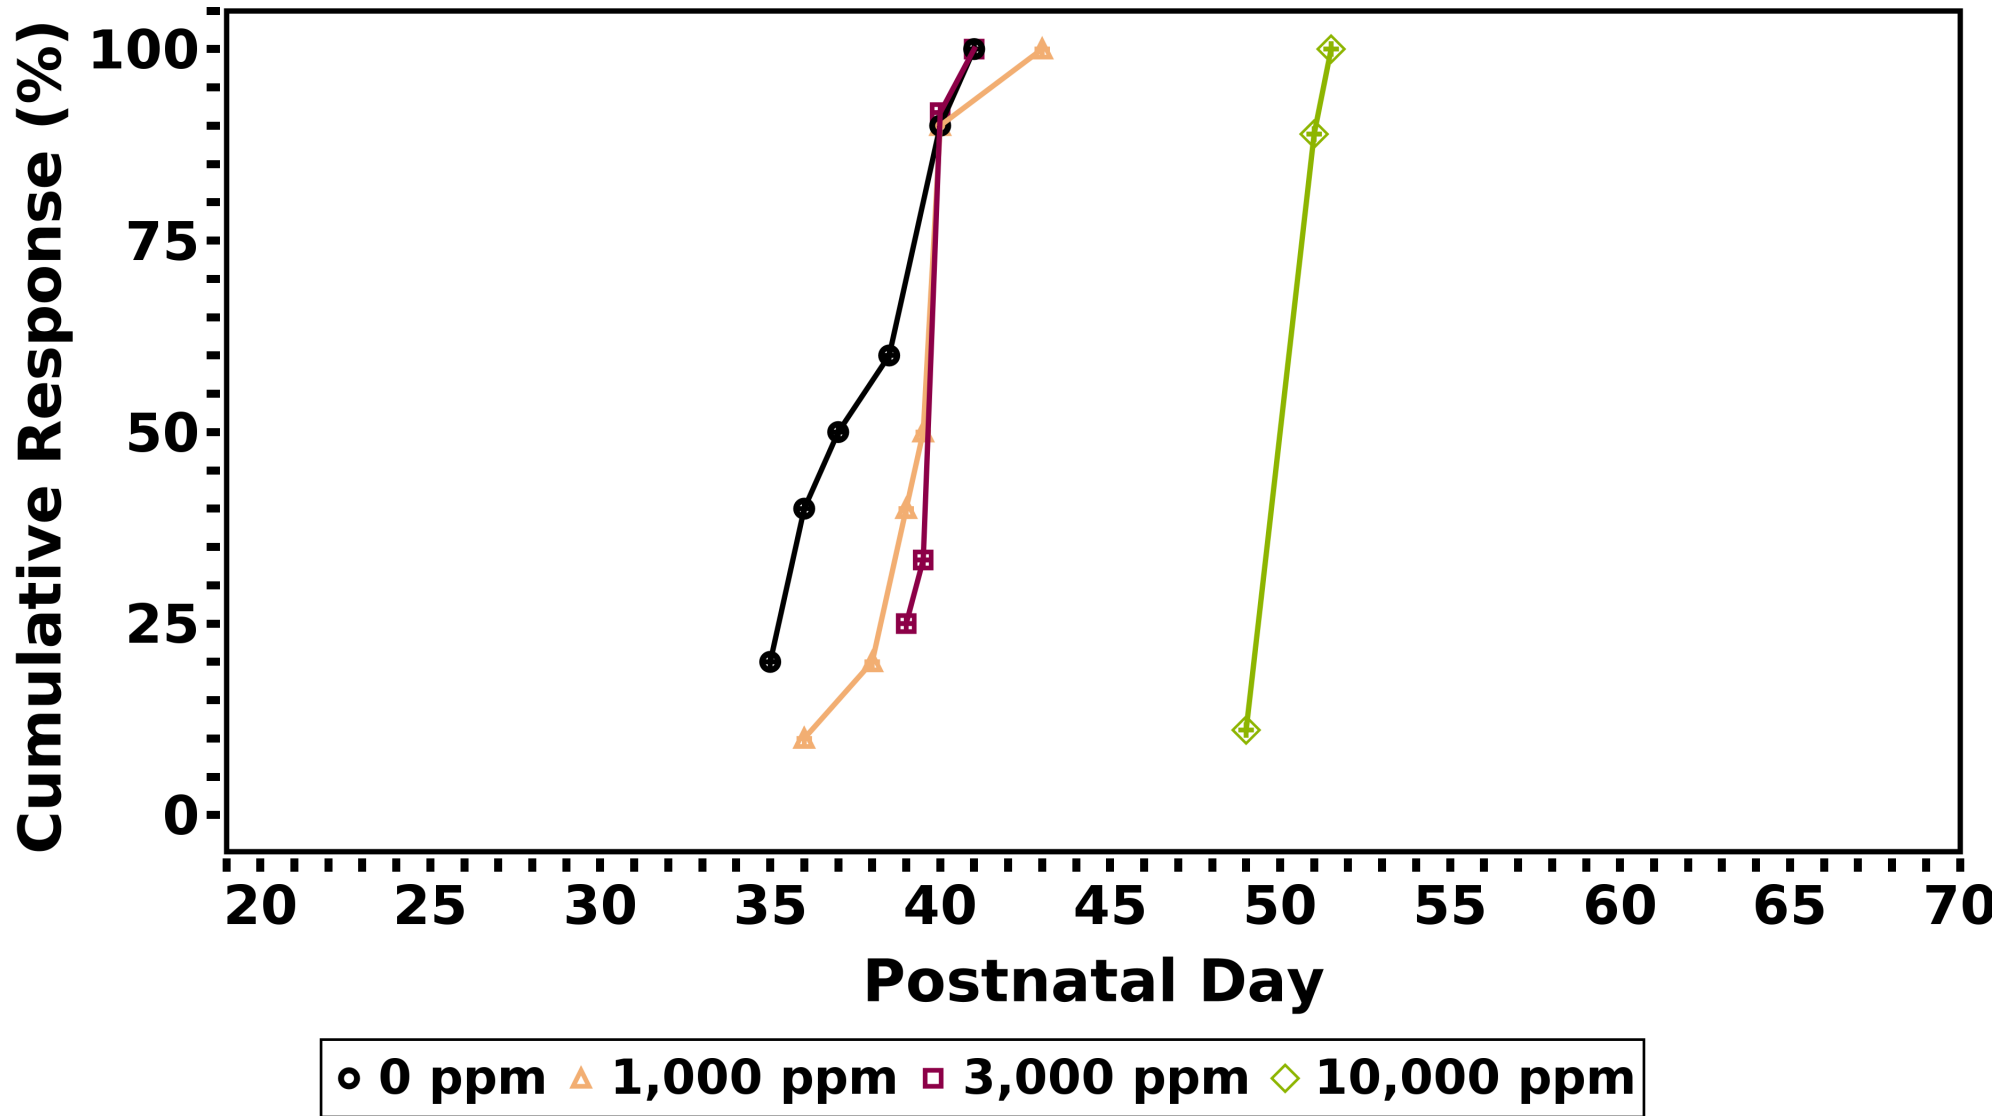

Study Number: MOG11042
Test Type: MOG - Range Finding
Route: Dosing in Feed
Species/Strain: Rat/Harlan Sprague Dawley

R16C: Time to Attainment Curves for Pubertal Markers
Test Compound: Triphenyl Phosphate
CAS Number: 115-86-6

Date Report Requested: 07/11/2022
Time Report Requested: 10:38:42
Lab: Battelle

F1 BPS Litter Response

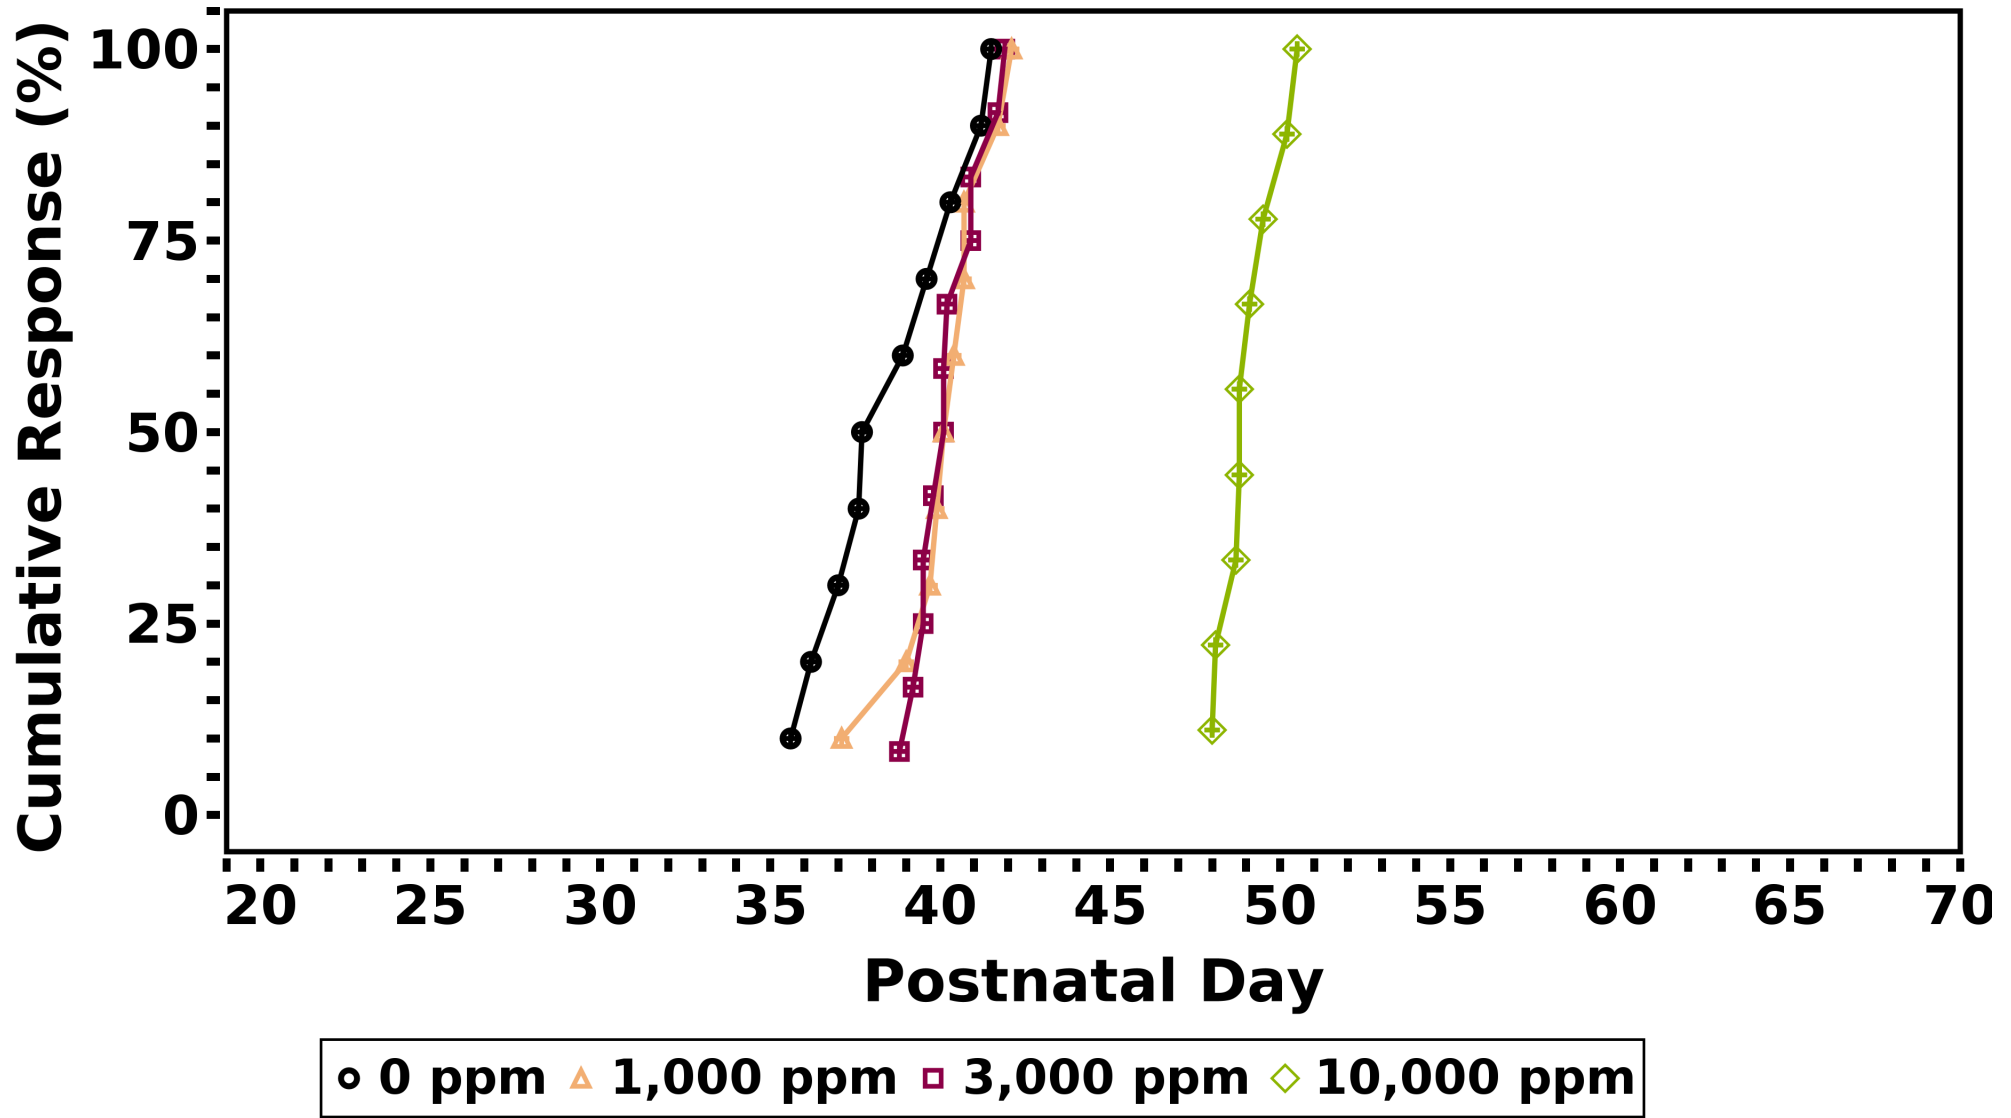

Study Number: MOG11042
Test Type: MOG - Range Finding
Route: Dosing in Feed
Species/Strain: Rat/Harlan Sprague Dawley

R16C: Time to Attainment Curves for Pubertal Markers
Test Compound: Triphenyl Phosphate
CAS Number: 115-86-6

Date Report Requested: 07/11/2022
Time Report Requested: 10:38:42
Lab: Battelle

F1 BPS Adjusted Litter Response

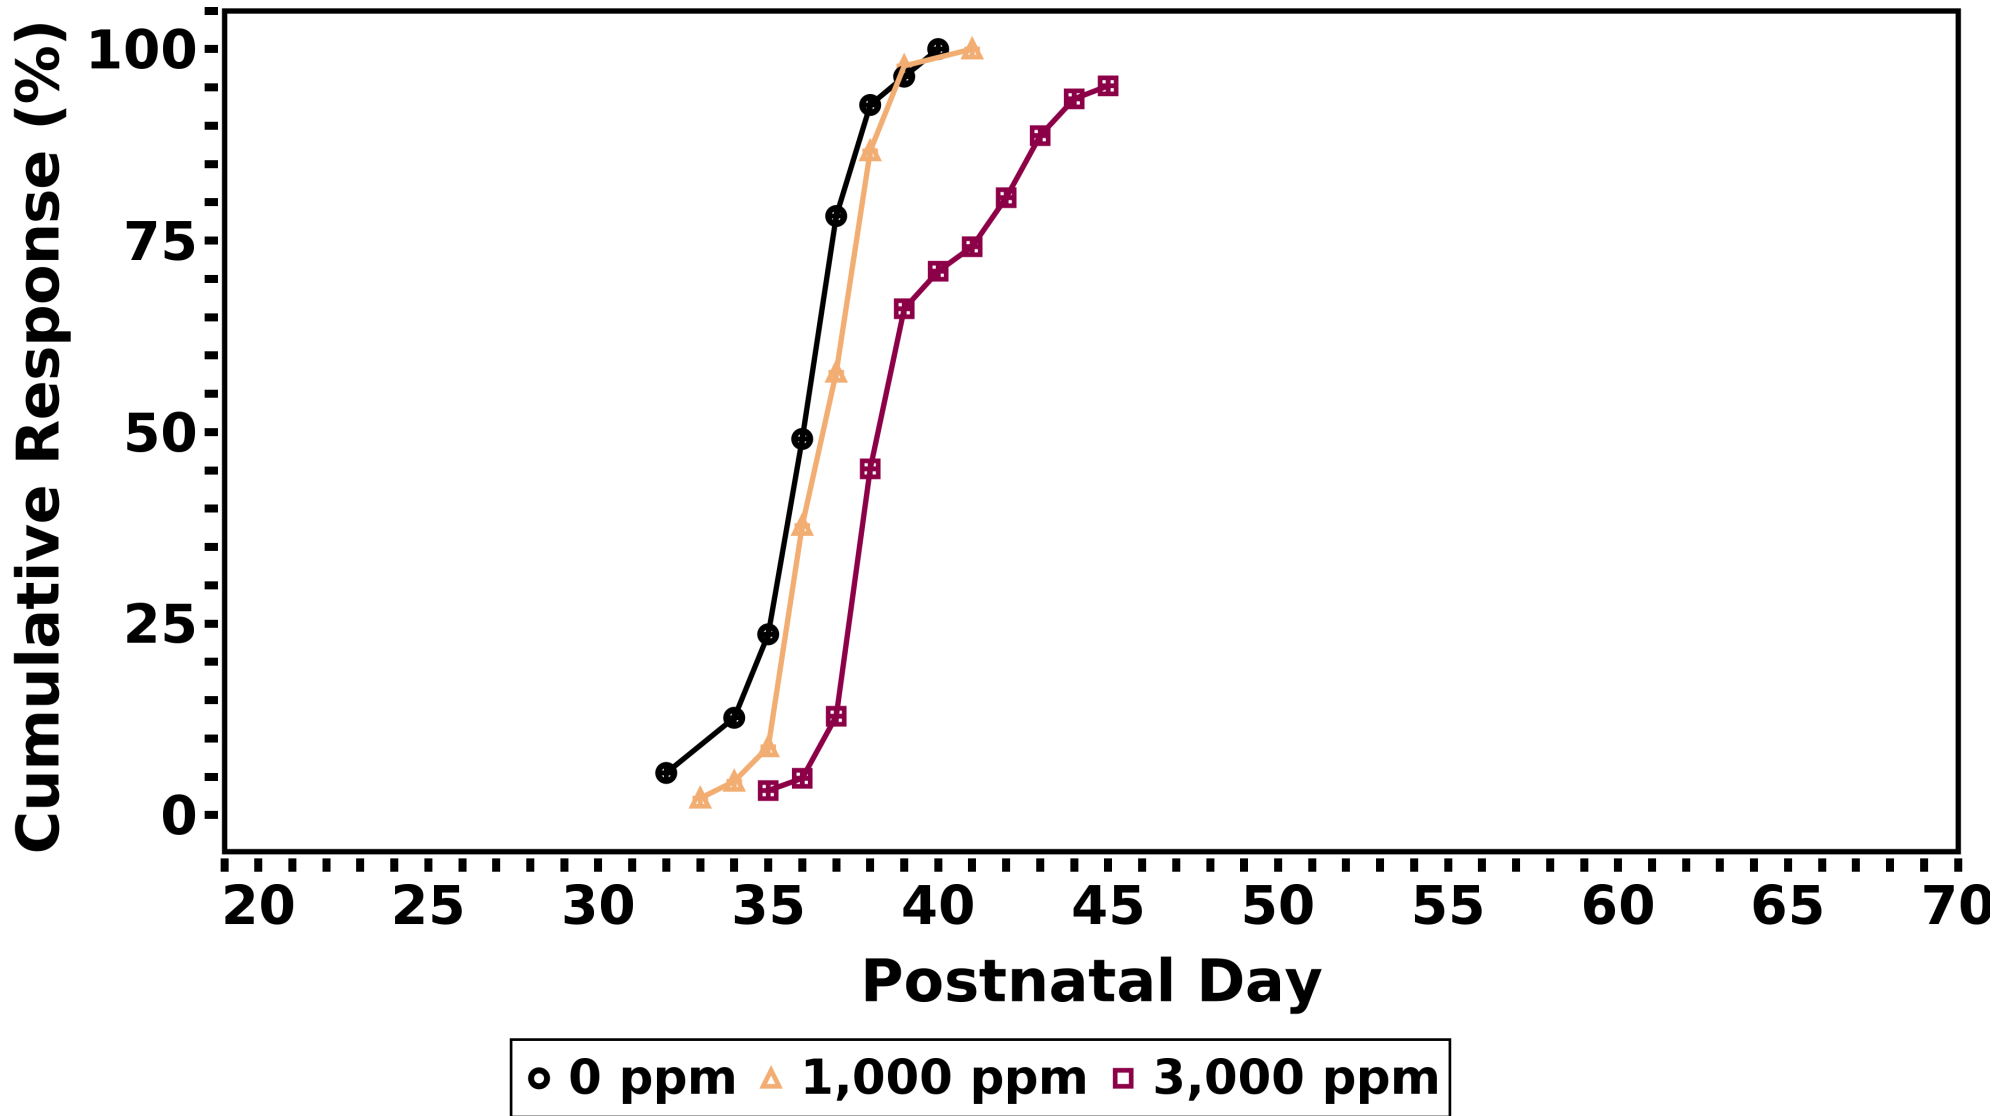

Study Number: MOG11042
Test Type: MOG - Range Finding
Route: Dosing in Feed
Species/Strain: Rat/Harlan Sprague Dawley

R16C: Time to Attainment Curves for Pubertal Markers
Test Compound: Triphenyl Phosphate
CAS Number: 115-86-6

Date Report Requested: 07/11/2022
Time Report Requested: 10:38:42
Lab: Battelle

F1 VO Individual Response

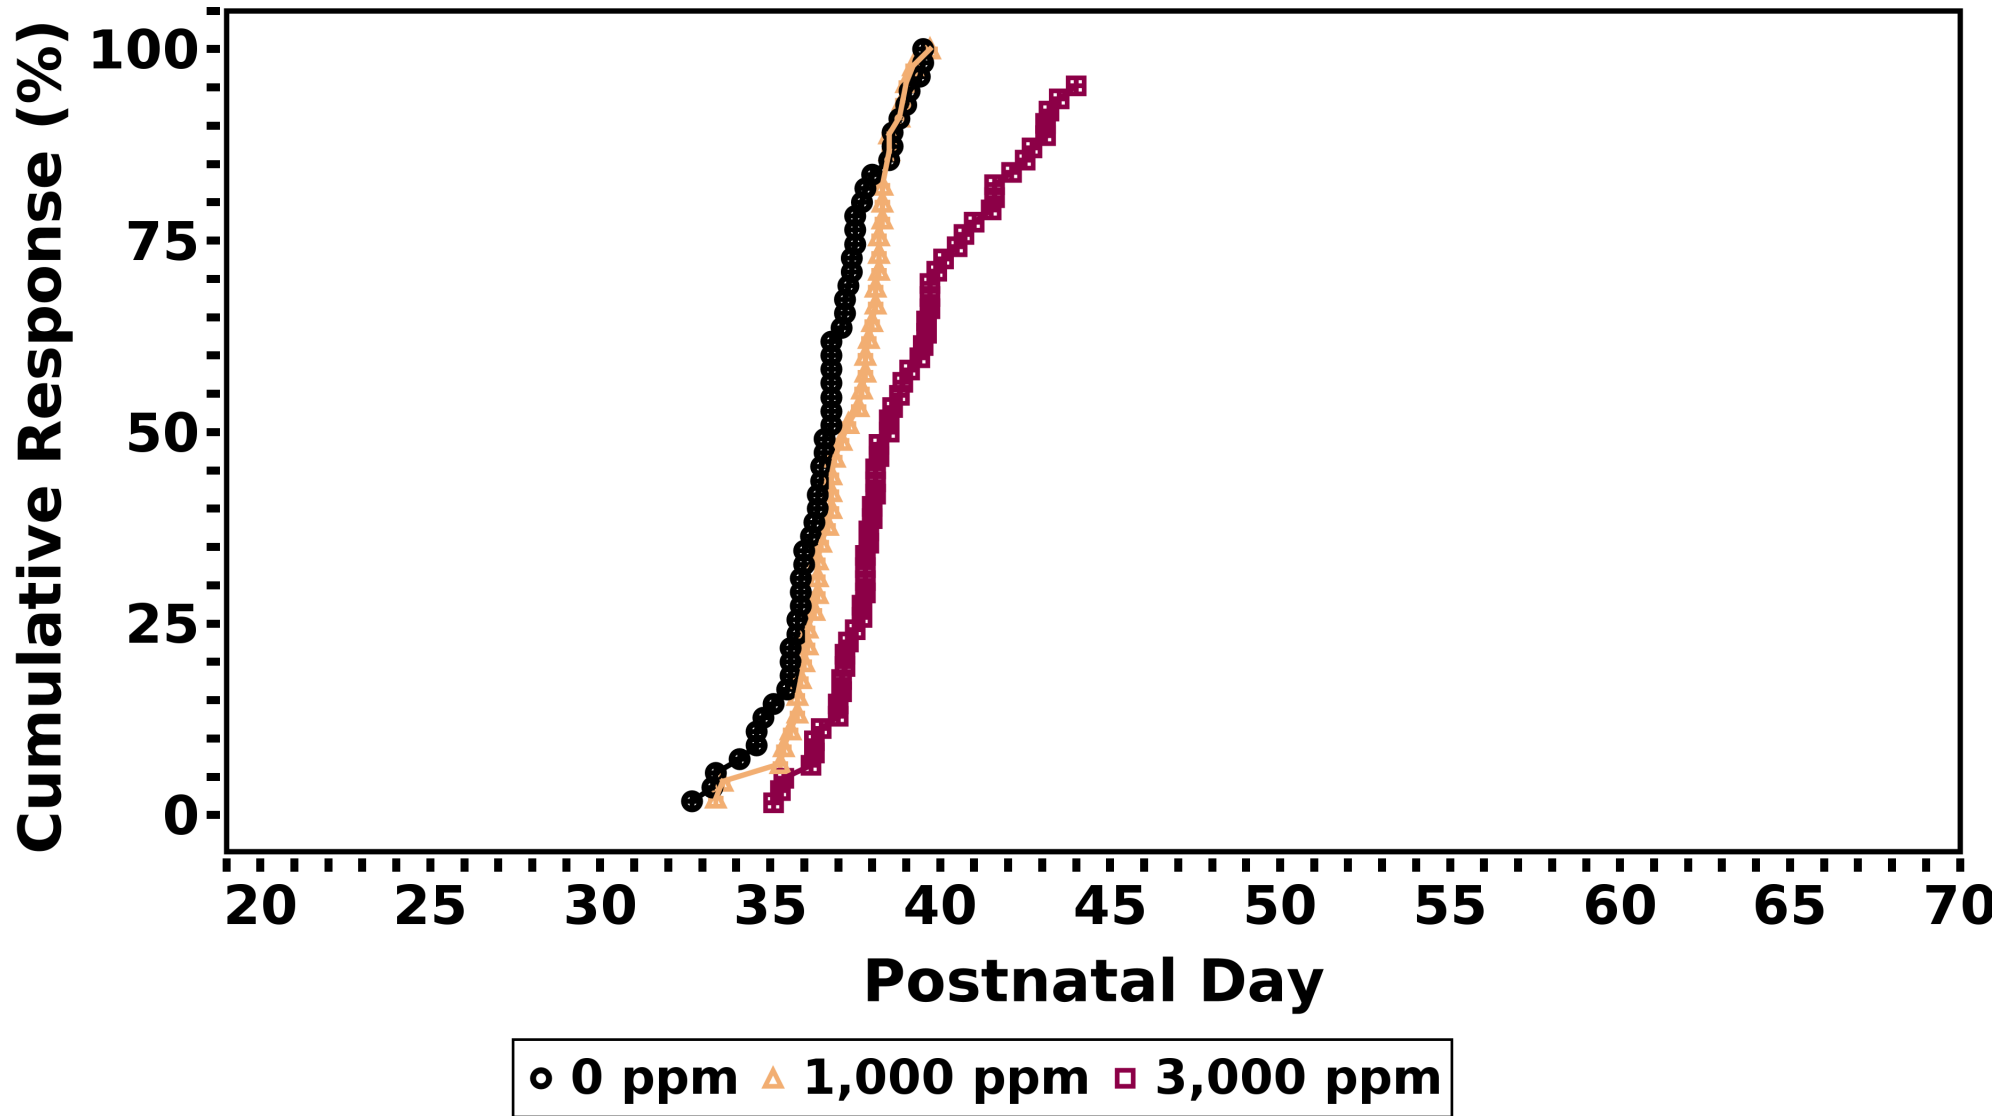

Study Number: MOG11042
Test Type: MOG - Range Finding
Route: Dosing in Feed
Species/Strain: Rat/Harlan Sprague Dawley

R16C: Time to Attainment Curves for Pubertal Markers
Test Compound: Triphenyl Phosphate
CAS Number: 115-86-6

Date Report Requested: 07/11/2022
Time Report Requested: 10:38:42
Lab: Battelle

F1 VO Adjusted Individual Response

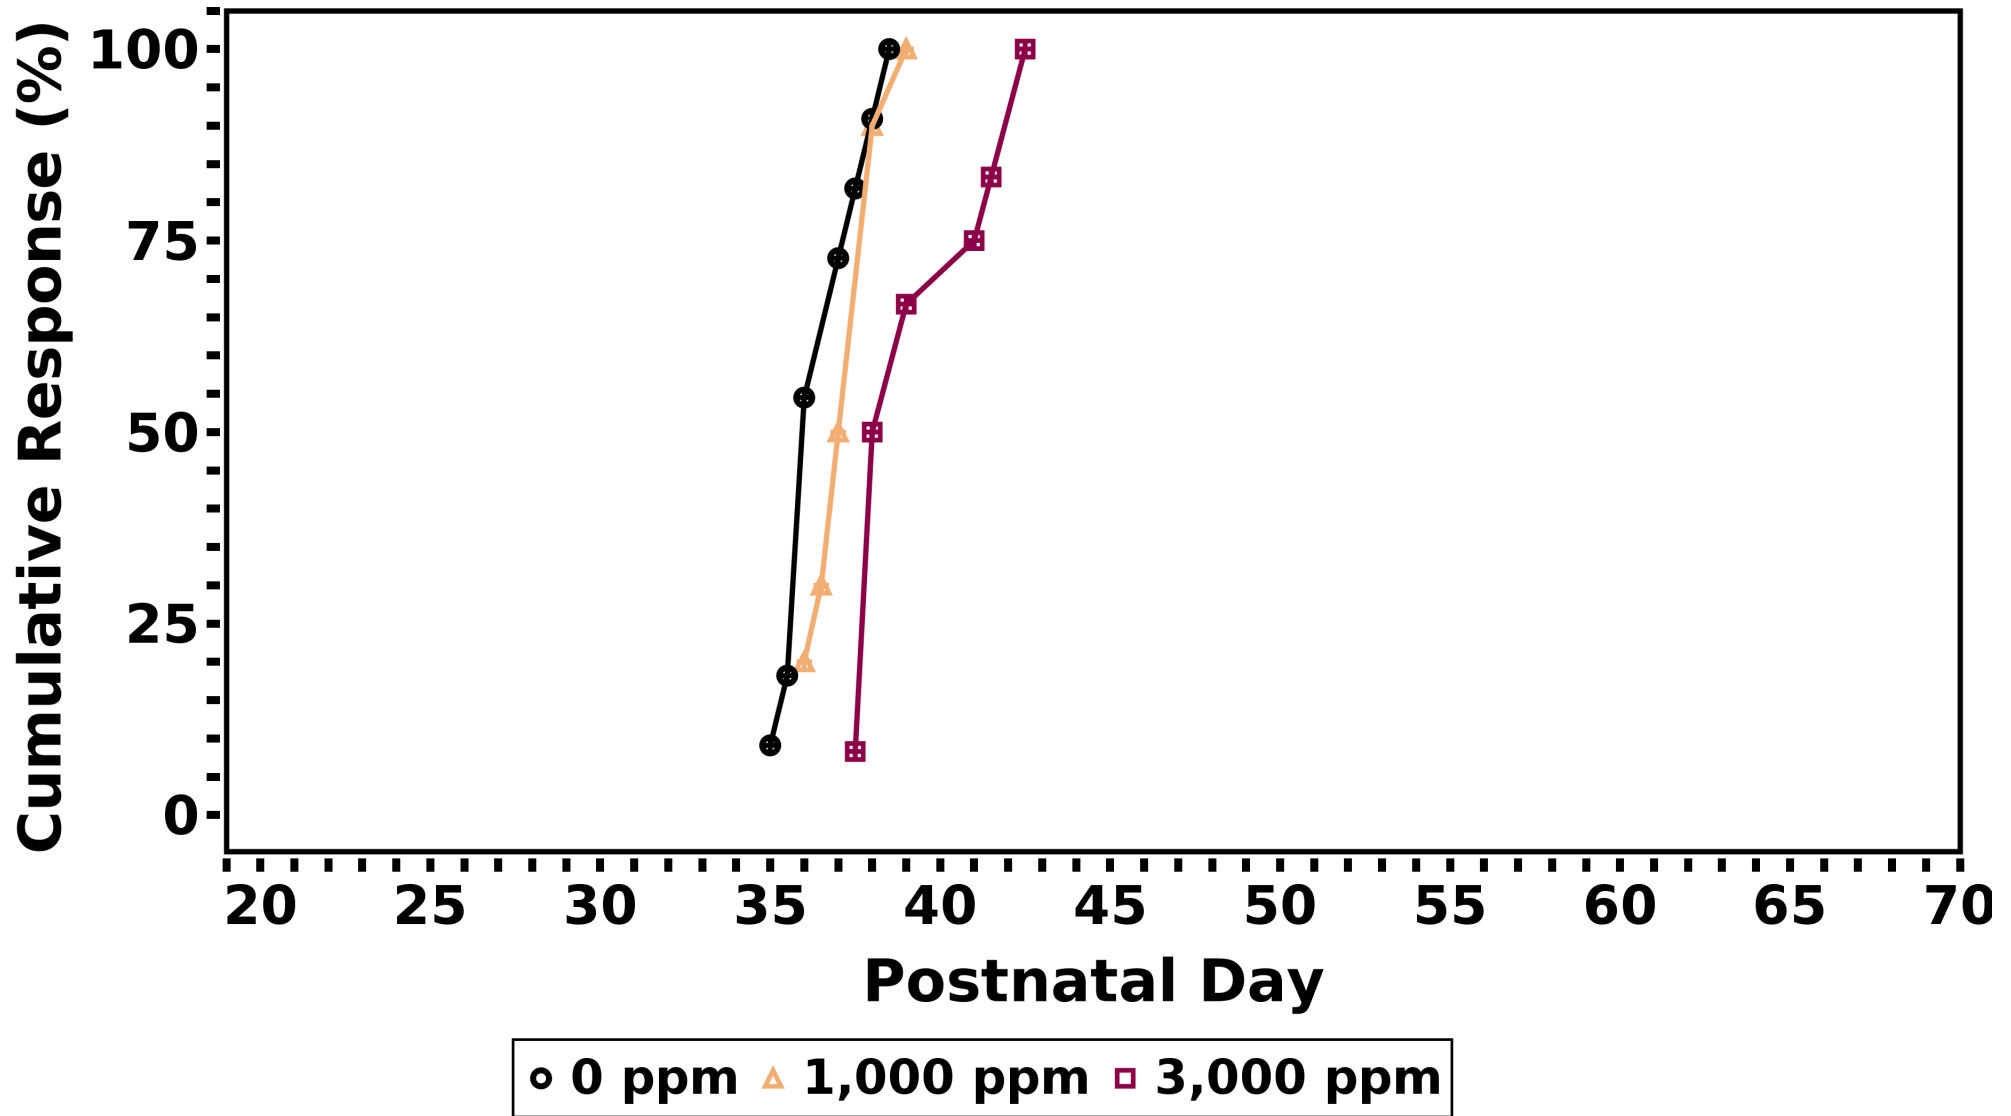

Study Number: MOG11042
Test Type: MOG - Range Finding
Route: Dosing in Feed
Species/Strain: Rat/Harlan Sprague Dawley

R16C: Time to Attainment Curves for Pubertal Markers
Test Compound: Triphenyl Phosphate
CAS Number: 115-86-6

Date Report Requested: 07/11/2022
Time Report Requested: 10:38:42
Lab: Battelle

F1 VO Litter Response

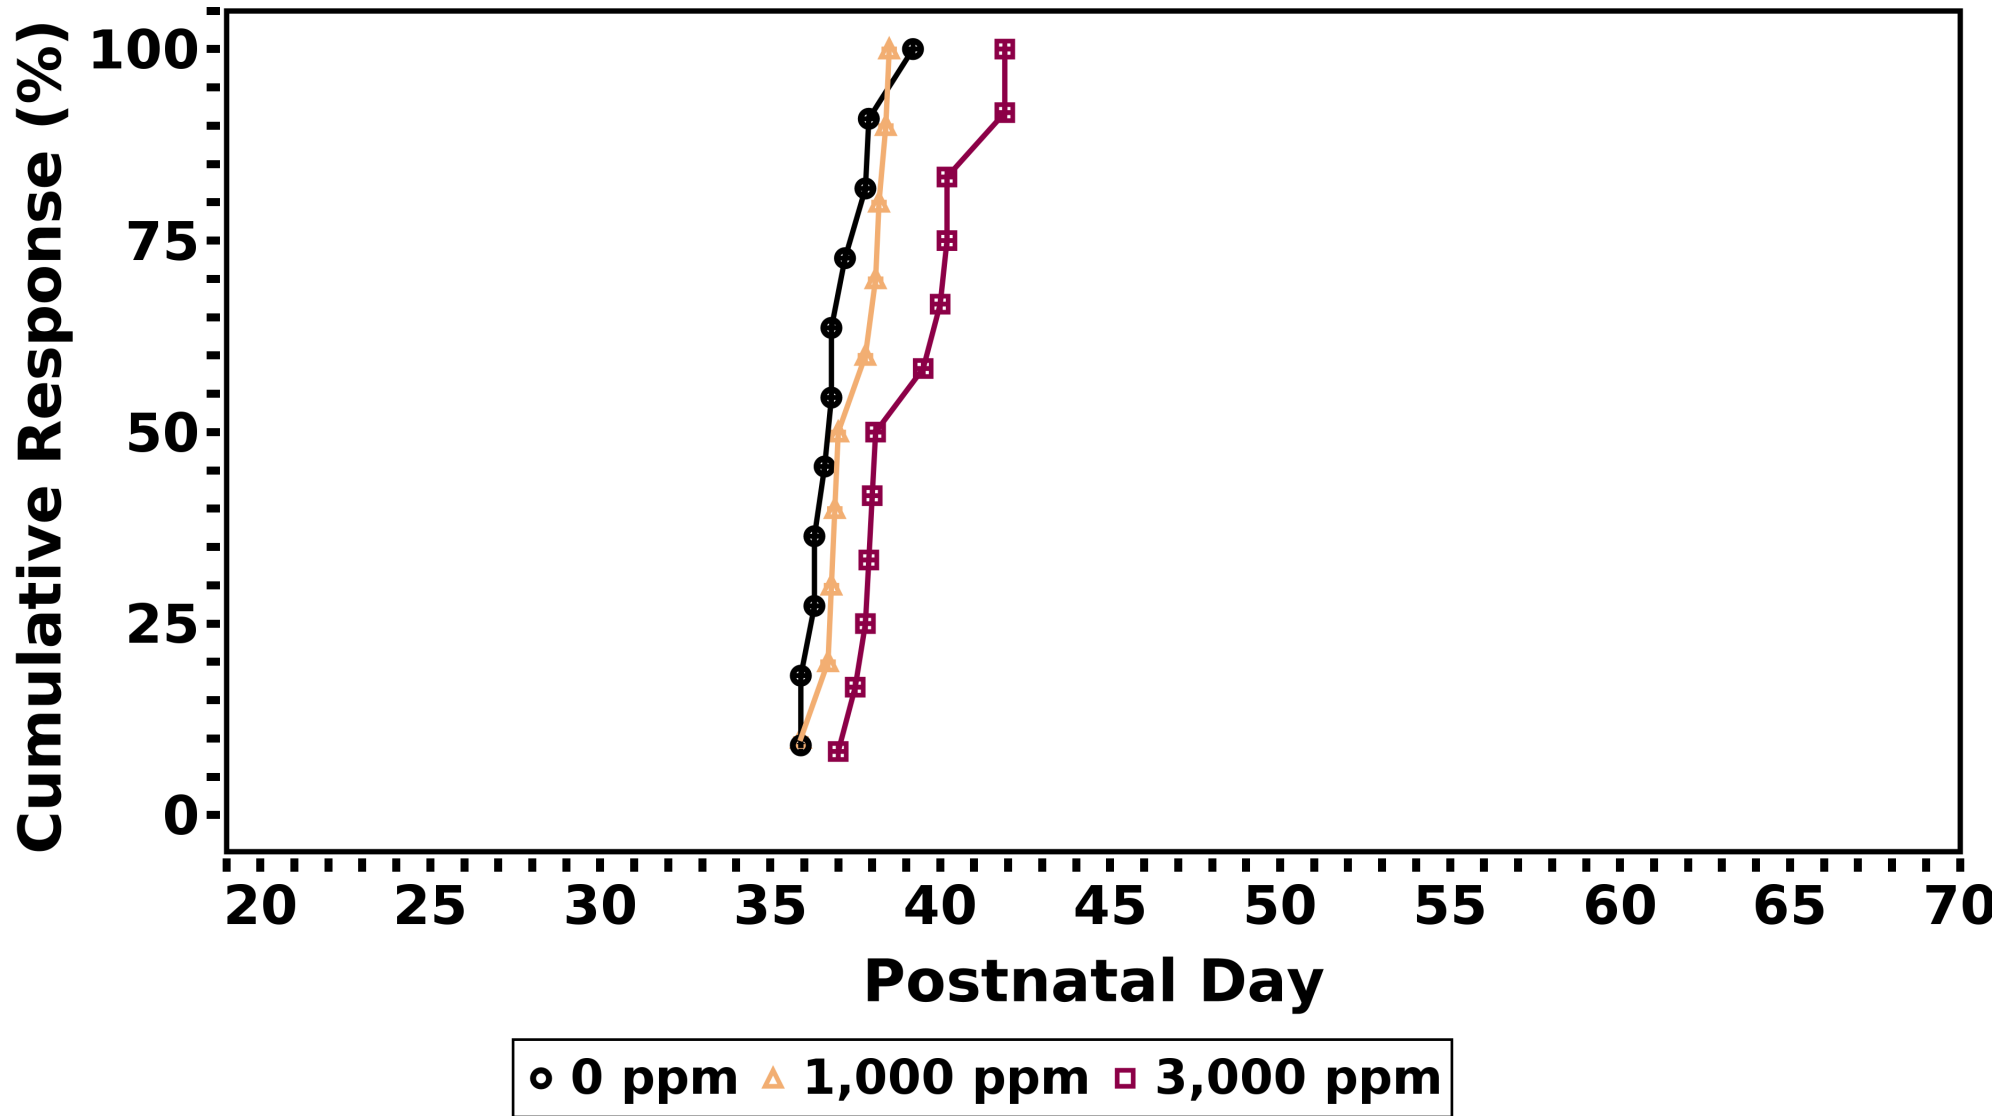

Study Number: MOG11042
Test Type: MOG - Range Finding
Route: Dosing in Feed
Species/Strain: Rat/Harlan Sprague Dawley

R16C: Time to Attainment Curves for Pubertal Markers
Test Compound: Triphenyl Phosphate
CAS Number: 115-86-6

Date Report Requested: 07/11/2022
Time Report Requested: 10:38:42
Lab: Battelle

F1 VO Adjusted Litter Response

Study Number: MOG11042

Test Type: MOG - Range Finding

Route: Dosing in Feed

Species/Strain: Rat/Harlan Sprague Dawley

R16C: Time to Attainment Curves for Pubertal Markers

Test Compound: Triphenyl Phosphate

CAS Number: 115-86-6

Date Report Requested: 07/11/2022

Time Report Requested: 10:38:42

Lab: Battelle

LEGEND

BPS = Balanopreputial separation; VO = Vaginal opening

Cumulative response percent, obtained using the methods of Kaplan-Meier, are plotted against the time to attainment values (adjusted or unadjusted).

For time to attainment data, in addition to the raw VO and BPS values being used for the estimates, values for animals having attained VO or BPS were also adjusted for weaning weight. Animals without a weaning weight were removed from the calculations.

For both individual and litter response analysis, non-attaining animals removed from the study prior to postnatal day 45 (VO) or postnatal day 53 (BPS) are excluded from the calculations.

For litter response analysis, the median attainment time per litter is used as time to attainment if >50% of pups in the litter attained VO or BPS. Otherwise, litters not having >50% pups attaining VO or BPS were treated as not attaining by the end of the observation period.
