a: P-value and direction of trend

b: Each dose was compared to the control with Williams' test when a trend was present (P<.01 from Jonckheere's trend test) or with Dunnett's test when no trend was present [\* = P<0.05, \*\* = P<0.01]

c: Mean ± standard error [number of dams]

d: LD=Lactational Day

e: Changes in n are the result of standardization on lactation day (LD) 4 and removing litters with no surviving pups by LD 8 (one litter in the 250 mg/kg/day group) and LD 28 (one litter in the 750 mg/kg/day group).
